1) How does the website portray the indented Idea? Is it clear what the website is about?

It is relatively clear what the website is about since all of the tabs are about him. It portrays the idea decently, and tells me more about him as a person.

2) What was your very first impression on this website?

It is quite simple and barebones, there isn't a lot of fluff, however there are also no footers or anything.

3) What do you like about this website?

The colors are reasonably soft and do not scream at me. The hobbies page is nice.

4) Describe the overall tone, design, use of color, images, layout, etc

The colors work well together generally, with the light blue and black repeating across every slide. The hobbies page looks a bit different in comparison to the other pages but it doesn't look bad.

5) Describe the website navigation, is it easy, hard, and room for improvement?

The navigation is super easy, I noticed home is always highlighted no matter which page I am on though.

6) What suggestions can you offer to improve this website?

Add a little bit more to the home page maybe? The site does look a bit barren and could probably use something else too but I am not sure what.
